CAREER OBJECTIVE

Computer Science undergraduate (B.Tech, 2027) focused on frontend and full-stack web development. Built and deployed responsive web applications using React, Next.js, and MongoDB, and integrated APIs in hackathon and personal projects. Seeking an entry-level Frontend / Web Developer role to build clean, responsive user interfaces.

EDUCATION

B.Tech in CSE, United Institute of Technology, Prayagraj SGPA: 6.35 (6th semester)	<i>Expected 2027</i>
Intermediate (CBSE), Green Fields Academy 68%	<i>2023</i>
High School (CBSE), Green Fields Academy 84%	<i>2021</i>

PROJECTS

BitLink: URL Shortener Next.js, React, MongoDB, Vercel Live · GitHub	<i>2026</i>
- Built and deployed a full-stack URL shortener with Next.js and MongoDB; users create short links with an optional custom code and no sign-up. - Implemented link creation and redirect handling backed by MongoDB, and fixed database connection caching for Vercel's serverless environment. - Built a responsive multi-page UI (navbar, hero section, generator, about, contact) and resolved mobile layout issues.	
Weather App React, Vite, REST API Live · GitHub	<i>2025</i>
- Built a responsive weather web app with React and Vite that fetches and displays live weather data from a third-party API. - Structured the interface as React components and deployed it to GitHub Pages.	
MediBook: Medical Appointment System Node.js, Express, EJS, Firebase Live · GitHub	<i>2026</i>
- Built a full-stack medical appointment management system with Node.js, Express, EJS, and Firebase Firestore, supporting patient, doctor, and admin roles. - Implemented features for managing appointments, prescriptions, and healthcare information across user roles. - Migrated the data layer from MySQL to Firebase Firestore for improved scalability.	
Bank Management System Java (Swing, AWT), MySQL	<i>August 2024</i>
Built a fully functional desktop bank management system in Java (Swing, AWT) with MySQL for data storage.	

INTERNSHIP & TRAINING

IBM MOOC Internship: Web & Mobile Development	<i>July - August 2025</i>
Completed internship focused on web and mobile development; built an e-commerce website to reduce offline crowding, receiving a stipend for project contribution and performance.	
Core Java Training, United Institute of Technology	<i>August 2024</i>
Completed Core Java with the Collections Framework; developed a GUI-based Car Rental Management System demonstrating object-oriented design.	

HACKATHONS & ACHIEVEMENTS

SIH Internal Hackathon: 2nd Place	<i>October 2025</i>
Worked on API integration and prototype development for a social health problem; worked through deployment challenges, strengthening teamwork, time management, and problem-solving.	
UHACK 3.0 Hackathon: Participant	<i>October 2024</i>
Created Nestify, a responsive web platform (HTML, CSS, JavaScript) connecting builders, interior designers, and customers for home construction.	
Google Solution Challenge: Participant	
Took part in the global competition to design technology solutions aligned with the UN Sustainable Development Goals.	

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Responsive Web Design

Back-End & Databases: Node.js, MongoDB, MySQL, REST API Integration

Tools & Deployment: Git, GitHub, Vite, Vercel, GitHub Pages, VS Code, Android Studio

Programming & CS Core: Java, Data Structures & Algorithms
